

SLOPE STABILITY SYMPOSIUM 2018

ACCEPTED PAPERS

1	Managing Blast-Induced Highwall Deformation Using an Improved Signature Hole Technique: A Case Study from Cortez Gold Mines, northeast Nevada, USA. P. Jenks, J. Silva Castro, M. Morfin	Oral
3	An application of point estimation methods to assess open pit slope stability. M. Valerio, S. D'Ambra, R. Woodward	Oral
7	Geotechnical Review of an Open Cut Coal Mine Slope using 3D Limit Equilibrium Modelling and New Empirical Run Out Prediction Charts. A. McQuillan, I. Canbulat, J. Oh, S. Gale, T. Yacoub	Oral
8	Bench face reliability – compensation and adjustments. J. Mathis	Posted
11	Use of radar system for real-time safety-critical slope monitoring and long-term mine planning in Siilinjärvi mine, Finland. S. Mononen, M. Suikkanen, N. Coli, F. Meloni	Oral
12	A coupled probabilistic-numerical methodology for the reliability-based design of slopes. A. V. Deliveris, I. E. Zevgolis, N.C. Koukoulas	Oral
14	Stability Analysis of the working face slope and the inner dump in a lignite open pit mine. V. Pozo, D. De Paz, J. Salas, J.M. Galera	Oral
15	Slope Design Reconciliation - Closing the Loop. M. Bester, T. Russell, R. Carey	Posted
16	Effect of Rock Mass Strength Parameters Variation on the Fracturing Amount in Rock Slopes. A. K. Alzo'ubi	Oral
17	Design of a pile reinforcement of a motorway slope in soft cohesive soils. G. Ibarra, E. Chávez, M. Cabo, J.M. Galera	Posted
18	"A review of the bench slope design at the Aitik and Salmijärvi open pits, Sweden". R. Ortiz and P. Gómez	Oral
19	Aguablanca, a case study in slope stability management. P. O'Bryan, M. Barrero Bouza, L. Merino Tores, C. Moreira Ascenso	Oral
20	The Uncertainty of Rock Mass Shear Strength Estimates: How to Incorporate the Reduction in Variance Due to Spatial Averaging for Use in Probabilistic Analysis. S.D. Cylwik, J.A. Beck, T.M. Ryan	Oral
21	Geotechnical characteristics of spoil materials in European open pit lignite mines. Mohsen S. Masoudian, Hossein Zanganeh, Alec M. Marshall, Charles M. Heron	Oral

23	New radar-based methods for rockfall hazard mitigation in open-pit mines. M. Cecchetti , M. Rubino, F. Coppi, N. Boldrini, N. Coli, C. Preston, P.J. Jenks	Posted
24	Implications for other hard rock mines of slope steepening investigation and performance improvements at the Tio Pit, Rio Tinto Fer et Titane, Quebec. M. Rougier, F. Hees, C.Gravel	Oral
25	Analytical Scarp Detection Model – Defining an Intuitive Indicator through Local Dispersion Analysis of Landslide Point Clouds. A. Fernández Guijarro, J.M. Hurtado Sola	Posted
26	Open Pit Optimization at Kışladağ Gold Mine. S. Ergun, HP. Grobler, E. Ozkan & G. Furtana	Posted
28	Overall probability of failure of rock slopes with multiple failure modes. J. Dong Du	Oral
29	"Effects of the Blast Vibration Frequency on the Shear Strength of the Joints and Pit Slope Stability. A. Siamaki, K. Esmaeili, B. Mohanty	Posted
34	Influence of parameters on the development of landslides in Estrada de Ferro Vitória-Minas slopes. D.Santos da Silva, C. Corteletti, A. Medeiros Santos	Posted
35	The use of the Maptek I-Site 8820 laser scanner and Sentry software system in managing brittle rock movements at the Kanmantoo Copper Mine in Australia. B. J. Hutchison, J. Chambers, S. Gannon, and J. Herrmann	Oral
36	Risk assessment and management of effects of groundwater in mining pits. S. O'Neill	Oral
37	DFN based analysis of step path failure pathways for improved slope stability analysis. S. Rogers, P. Hamdi, K. Moffitt, B. Dershowitz	Oral
38	Probabilistic Bench Scale Slope Designs Based Upon Realistic Discrete Fracture Network Models. S. Rogers, S. D'Ambra, B. Dershowitz, R. Turnbull	Posted
40	Management of Geotechnical Data – AngloGold Ashanti Experience. J.M. Seery, C. Franklin and E.C.F. Hamman	Oral
44	Importance of characterization and representation of fault damage zones in slope stability models. J. Severin	Oral
50	Evaluation of geomechanical parameters through Factor Analysis. T. Barreto dos Santos, L. Regina Costa Silveira, M. Sabino Lana, T. Martins Pereira	Oral
51	Application of Principal Component Analysis to a dataset of rock mine slopes. A. E. Medeiros, M. Sabino Lana, D. Santos da Silva	Posted
52	Managing Water Pressures in a Steeply Dipping Coal-Mine Footwall. A. Duran and R.W.Seedsman	Oral

54	Bayesian inference of geotechnical parameters for slope reliability analysis. L. Contreras, E. T Brown	Posted
56	New radar-based method for monitoring of broad areas of blast-induced vibrations in open-pit mines. A. Michelini, F. Viviani, L. Leoni, C. Thomson, D. Rensburg, N. Coli	Posted
57	Possibilities of UAV in open-cast mine monitoring (project SLOPES). J. Burda, Z. Svatý, L. Žižka	Posted
62	Characterization of a large slope failure in an open-pit mine through the back-analysis of satellite InSAR and ground-based radar data. P. Farina, T. Carlà, E. Intrieri, H. Ketizmen, N. Casagli	Oral
63	A rockfall hazard appraisal and management system for quarries and open pit mines. S. J. Collins, J. Hall	Oral
64	3D finite element back analysis of a large rock slope failure on the East wall of the LAB Chrysotile Mine in Canada. P. Caudal, M. Grenon	Posted
68	DInSAR study over mining environments: Double geometry analysis and frequent update approach with Bulletins. Case study Silopi and Siirt Mines, Turkey. F. Sánchez, J. Raventós, H. Ketizmen Silopi Elektrik	Posted
69	Implementation of on-line monitoring and numerical modeling at western slope of Belchatow mine (Poland). Z. Bednarczyk	Posted
71	Identifying “signature” parameters of markedly brittle slope failures in monitoring data: experience from an open pit mine. P. Farina, T. Carlà, E. Intrieri, N. Casagli	Posted
77	Kinematic Evaluation of Pit Shell Designs using Geotechnical Block Models. J. Venter, K. du Plooy, E. Hamman	Oral
78	Managing the interaction between an active Sub-Level Cave and Open Pit operation from breakthrough to ongoing surface subsidence over 10 years at the Telfer Gold Mine. R. M. Turner, N. D. Rose, R. B. Langston, Jo. Cabello	Posted
82	Effect of Coal Rib stability on Internal dragline dump stability. R. Kumar Patel, A. Ray, R. Rai and B K Shrivastva	Posted
89	Back Analysis of Dump Slope Failure - a case study. S. Gupte, V. Suresh, J. Mandal	Posted
91	Determining the Optimum Slope Angle using an Integrated Mine Planning Approach. J. Venter, E. Hamman	Posted
92	A Safety Risk Model for Open Pit Slope Management. J. Venter, E. Hamman	Posted

94	Magnetic susceptibility and anisotropy of magnetic susceptibility; succesful tool for the detection of microshear in slopes stability studies. F. Martín-Hernández, M. Arlandi, D. Lugo	Posted
95	Applicability of Strain Softening Models to Slope Stability Analyses. C. Cancino, C. Álvarez, M. Díaz, R.Ledezma	Oral
97	Quantifying Transitional Rock Mass Disturbance in Open Pit Slopes Related to Mining Excavation. N.D. Rose, M. Scholz, J. Burden, M. King, C. Maggs and M. Havaej	Oral
100	Managing the Interaction between the Unstable West Highwall and the 2B Underground at the Barrick Golden Sunlight Mine, Montana, USA. R. Turner, Nick D. Rose, Radford B. Langston, J. Cabello	Oral
102	Suggested standards for improving structural geologic definition for open pit design. T.G.Carter	Oral
109	Advanced Strength Reduction Search Strategies Applied to Finite Element Analysis of Slope Stability. A. Dyson, A. Tolooiyan and R. Mackay	Posted
110	Managing and validating limited borehole geotechnical information for rock mass characterization purposes - a practical case for an open pit mine project in Peru. A. Huaman, J. Cabrera and A. Samaniego	Posted
115	Investigating the Elastoplasticity of Victorian Brown Coal Based on Stress-Path Triaxial Test Results. M. Karami, A. Tolooiyan and R. Mackay	Posted
123	Approach to Geotechnical Characterization and Slope Design in Specific Deposits Types. B. Murphy, W. Barnett	Oral
125	Key performance indicators for transition materials in tropical environments and their influence on bench slope stability. E. Saunders	Posted
126	Using Multichannel Analysis of Surface Wave (MASW) for Determining the Depth of Slip Surface Below Ground Level. M. Ghadrnan, A. Tolooiyan and R. Mackay	Posted
128	Numerical Investigation of Potential Pore Water Pressure Changes In Jointed Brown Coal Due To Waste Material Placement Against A Brown Coal Open-Cut Batter. T. Shaghghi, A. Tolooiyan and R. Mackay	Oral
135	Management of a slope failure at Punta de Aguilones quarry. E. Trigueros, M. Cánovas, M. Alcaraz, I. Alhama	Posted
136	The use of InSAR to monitor tailings dam's stability in the mining sector, case study Samarco, Brazil. A. Manso, C. Athayde Pinto, F. Sánchez, S. Carneiro, B. de Matos	Posted

141	Geotecnia sísmica y modelo progresivo distensivo de la onda canal en el terreno. A. Daza, J. Gutiérrez-Ravé y G. Aroca	Posted
142	Definition of intact rock bridges for 2D and 3D slope stability problems. D. Elmo, D. Stead	Oral
143	A complex geotechnical modelling of an open pit slope. Application to Cobre las Cruces North Slope. S. Cooper, M.D. Rodriguez, V. Pozo, J. Salas, JM. Galera	Oral
144	The Yellowstone Talc Mine. D. Morrison	Oral
145	Probabilistic stability analysis of slopes in highly heterogeneous rock masses. H. RafieiRenani, C. Derek Martin, P. Varona and L.Lorig	Oral
147	Improved understanding of active slope instability mechanisms in lignite operations. C. Vanneschi, J.Burdab, L.Žižkab, M.Eyrea, M.Francia, J.Coggan	Oral
148	The absence of correlation between the Barton-Bandis predicted shear strength and the observed shear strength from bedding partings in the Pilbara. A. Maldonado, A. Haile, K. Mercer	Posted
149	An Investigation of Slope Tension Crack Monitoring Using Fibre Optic Sensing. B. Yang, S. M. Aminossadati, Z. Chen, M. S. Kizil, H. Gong and G. Kennedy	Posted
150	Full Wall Control Blasting Optimization. B. Cebrian, M. Rocha, B. Morales, JL. Castañon, J. Floyd	Oral
153	State-of-the-Art Monitoring Techniques for Samarco Tailings Dams. L. Clarkson, S. Carneiro; B. de Matos Castilho; D. Williams; M. Ruest; M. Llano; and D. Noon	Oral
154	Managing Large Scale Failures – A Case Study from Ok Tedi Mine, Papua New Guinea. F.M. Weir, A.G Smith, J.Watton, M. Koek and P. Kuiria	Oral
155	Operational Risk Management of Land Based Beach Mining 30 m Below the Atlantic Ocean. S. Kirkpatrick, P. de Graaf, SW Jacobsz	Oral
156	Desmontes de gran altura para centrales de energía en Guatemala. J. Oteo, C. Oteo, P. Sola, C. Rozas	Posted
157	The application of run out analysis to mine site landslides. M. Llano-Serna	Oral
161	Undercutting Bedding to Optimise Pit Angles at Iron Ore Company of Canada – Can it be done?. G. Abrahams, L. Castro, J. Rodway	Posted
162	Refining the Wall Control Blasting Program at Rio Tinto’s Iron Ore Company of Canada Mine. . G. Abrahams, G. Powell, J. Hardy	Oral

163	Use of Response Surface Methodology in computationally intensive 3DEC models of open pit slope influenced by a block caving operation. M. Marciniak, E. Widzyk-Capehart, V. Rivero, D. Díaz	Oral
170	An empirical approach to define suitable slope design parameters for saprolite and transition material based on measuring the geometry of past slope failures and stable areas on interim pit slopes. K. Tasoren, K. Sattan	Posted
171	Evaluation of building damages due to open pit mine activities. Application on Mavropigi open mine – Greece. M. Alheib, N. Koukouzas, I.E. Zevgolis, A. Deliveris, S. Coccia	Oral
172	Stability assessment of rock slopes using empirical approaches: comparison between Slope Mass Rating and Q-slope. L. Jordá, N.I Bar, M. Cano González, A. Riquelme Guill, R. Tomás Jover	Posted
173	Evolution of Synthetic Aperture Radar technology for safety-critical monitoring in open pit mines. N. Coli, L. Leoni, F. Coppi, C. Preston	Posted
175	Optimization of rocky presplit - solid interaction using an advanced hybrid numeric model. F. Orellana and R. Ortiz	Posted
176	Comparing traditional and televiewer methods of structural data collection. K Llewelyn, A. McCracken, and M. Brown	Oral
178	A Multi-Disciplinary Approach to Dip Slope Mining in Jwaneng Mine Botswana. K. Gabanakgosi, K. Mosebi, O Mgorosi, O. M. Barei, K. Ntlotlang, T. Thokweng	Oral
179	Application of monitoring data for calibrating numerical models. J. Jung, T.Katsaga, L.Lorig	Oral
180	Complex rock slope failure mechanisms involving toppling. Leandro R. Alejano	Oral
181	"Computational tools for the determination of factor of safety and location of the critical circular failure surface for slopes in Mohr-Coulomb dry ground". C. Carranza-Torres and E. Hormazabal	Oral
