2	Predicting slope failures using slope-monitoring radar	S. Borron	Global Slope Monitoring	USA
3	An application of point estimation methods to assess open pit slope stability	M. Valerio	Golder Associates	Canada
4	UAV use for Photogrammetry of Sub-Vertical Highwall Faces and Geotechnical Structural Characterisation	A. N. Brown	Thiess Pty Ltd	Australia
5	Scale–effect considerations for shear strength assessment of coal mine spoil	L. Bradfield	Thiess Pty Ltd	Australia
6	Structural domaining for geotechnical slope design	R. Thomas	Absolute Geotechnics Pty	Australia
7	New Methodology for Estimating the Likelihood of Failure of an Excavated Slope in an Open Cut Coal Mine	A. McQuillan	University of New South Wales	Australia
8	Bench face reliability – compensation and adjustments	J. Mathis	Zostrich Geotechnical	USA
9	State of the practice for high capacity post-tensioned rock anchors. A slope stabilization perspective	N. Poves	University of British Columbia	Canada

No.	Title:	First Author:	Company:	Country:
10	Analysis of Large-Scale Pit Slope Stability — The Aitik Mine Revisited	J. Sjöberg	Itasca	Sweden
11	Use of radar system for real-time safety-critical slope monitoring and long-term mine planning in Siilinjärvi mine, Finland	S. Mononen	Yara Suomi Oy Siilinjärvi Mine	Finland
12	Coupled probabilistic-numerical methodology for the reliability-based design of slopes	A. V. Deliveris	CERTH – CPERI	Greece
13	Wall control blasting optimization. Rock-fall Safety, Increased Reserves, Reduced waste. Case studies	J. Floyd	Blast Dynamics	USA
14	Stability Analysis of the working face slope and the inner dump in a lignite open pit mine	V. Pozo	Subterra Ingeniería	Spain
15	Slope Design Reconciliation - Closing the Loop	M. Bester	Anglo American	South Africa
16	Effect of Rock Mass Strength Parameters Variation on the Fracturing Amount in Rock Slopes	A. K. Alzo'ubi	Abu Dhabi University	United Arab Emirates
17	Design of a pile reinforcement of a motorway slope in soft cohesive soils	G. Ibarra	Subterra Ingeniería	Chile
18	A review of the bench slope design at the Aitik and Salmijärvi open pits, Sweden	R. Ortiz	Itasca	Chile

No.	Title:	First Author:	Company:	Country:
19	Aguablanca, a case study in slope stability management	P. O'Bryan	P. O'Bryan	Australia
20	Standard Deviation of Rock Mass Shear Strength: How to Incorporate the Reduction in Variance Due to Spatial Averaging for Use in Probabilistic Analysis	S.D. Cylwik	Call & Nicholas	USA
21	Geotechnical characteristics of spoil materials in European open pit lignite mines	M. Masoudian	University of Nottingham	United Kingdom
22	New Approach to Detect Imminent Failure by Utilising Coherence Attribute Measurement on Ground Based Slope Stability Radar (SSR)	F. Andika	GroundProbe	Indonesia
23	New radar-based methods for rockfall hazard mitigation in open-pit mines	N. Coli	IDS GeoRadar	Italy
24	Slope steepening through investigation and performance improvements at the Tio pit, Rio Tinto Fer et Titane, Quebec	M. Rougier	Golder Associates	Canada
25	Analytical Scarp Detection Model – Defining an Intuitive Indicator through Local Dispersion Analysis of Landslide Point Clouds	A. Fernández	Geocontrol	Spain
26	Open Pit Optimization at Kışladağ Gold Mine	S. Ergun	Eldorado Gold Corporation	Turkey
27	Optimal shapes of the slopes for open pit mines	S. Utili	Newcastle University	United Kingdom

No.	Title:	First Author:	Company:	Country:
28	Overall probability of failure of rock slopes with multiple failure modes	J. Dong Du	SNC-Lavalin	Canada
29	Effect of Blast Vibration on Degradation of Shear Strength of Discontinuities and Pit Slope Stability	A. Siamaki	University of Toronto	Canada
30	A new rockfall hazard assessment approach for urban areas in tropical regions	R. Costa	Federal University of Ouro Preto	Brazil
31	Recognizing blast damage and its impact on achievable bench face angles	R. Barkley	Call & Nicholas	USA
32	Improved Safety through Pit Slope Optimization: Valley Pit Phase 8 Slope Steepening Project	M. Veillette	Teck Highland Valley Copper	Canada
33	Mine slope global failure: back analysis and redesign	I. García	SRK Consulting	Argentina
34	Influence of parameters on the development of landslides in Estrada de Ferro Vitória-Minas slopes	C. Corteletti	Federal University of Ouro Preto	Brazil
35	The use of the Maptek I-Site 8820 laser scanner and Sentry software system in managing brittle rock movements at the Kanmantoo Copper Mine in Australia	B. J. Hutchison	Hillgrove Resources	Australia
36	Risk assessment and management of effects of groundwater in mining pits	S. O'Neill	O'Neill Hydro-Geotechnical Engineering	Canada

No.	Title:	First Author:	Company:	Country:
37	DFN based analysis of step path failure pathways for improved slope stability analysis	S. Rogers	Golder Associates	Canada
38	Probabilistic Bench Scale Slope Designs Based Upon Realistic Discrete Fracture Network Models	S. Rogers	Golder Associates	Canada
39	Design, Development and Slope Performance of the East Highwall at the Barrick Cortez Hills Open Pit Mine, Northeast Nevada, USA	P. Jenks	Barrick	USA
40	Management of Geotechnical Data – AngloGold Ashanti Experience	J. M. Seery	AngloGold Ashanti	South Africa
41	Discontinuity mapping bias and bench face angle reliability	J. Mathis	Zostrich Geotechnical	USA
42	Numerical simulation of spoil slopes using an anisotropic elastic-viscoplastic model	H. Zanganeh	University of Nottingham	United Kingdom
43	Stress Heterogeneity near Open Pits	J. Severin	Piteau Associates	Canada
44	Importance of characterization and representation of fault damage zones in slope stability models	J. Severin	Piteau Associates	Canada
45	A real-time ground motion disaster mitigation system based on satellite, drone and ground radar images for improving the mining industry safety and efficiency	J. Duro	Dares Technology	Spain

No.	Title:	First Author:	Company:	Country:
46	Highly reliable and cost efficient slope stability monitoring: A revolution for mining operators thanks to free radar satellite images and image processing advancements	J. Granda	Dares Technology	Spain
47	Wireless monitoring of pore-pressure and dewatering activities in the Aitik Boliden Mine in northern Sweden	C. Lafuente	Worldsensing	Spain
48	An integrated, multi-sensor remote sensing approach for rock mass and damage characterization	D. Donati	Simon Fraser University	Canada
49	The use of multivariate statistical methods in risk assessment systems for mine slopes	T. Barreto	Federal University of Ouro Preto	Brazil
50	Evaluation of geomechanical parameters through Factor Analysis	T. Barreto	Federal University of Ouro Preto	Brazil
51	Application of Principal Component Analysis to a dataset of rock mine slopes	A. E. Medeiros	Federal University of Ouro Preto	Brazil
52	Steeply dipping footwalls in coal mines	A. Duran	Pells Sullivan Meynink	Australia
53	Improved Safety through Pit Slope Optimization: the Valley Pit Phase 8 Slope Steepening Project	M. Veillette	Teck Highland Valley Copper	Canada
54	Bayesian updating of geotechnical parameters in pit slope design	F. Contreras	The University of Queensland	Australia

No.	Title:	First Author:	Company:	Country:
55	Determining Field Scale Properties of Discontinuities for Geotechnical Analysis	A. Ford	The University of Queensland	Australia
56	New radar-based method for monitoring of broad areas of blast-induced vibrations in open-pit mines	N. Coli	IDS GeoRadar	Italy
57	Possibilities of UAV in open-cast mine monitoring (project SLOPES)	J. Burda	VÚHU Most	Czech Republic
58	An overview of safety critical monitoring at Kao Mine, Lesotho	S. Coetsee	SRK Consulting	South Africa
59	An Overview of Bench Design for Cut Slopes – A Case Study	S. Coetsee	SRK Consulting	South Africa
60	Mitigation of bench scale failure risk and ramp protection at Kolomela mine - A case study	J. Hattingh	Kumba Iron Ore	South Africa
61	Lateral affectation of rockfall due to vertical operation	E. Bermedo	El Soldado Mine	Chile
62	Characterization of a large slope failure in an open-pit mine through the back-analysis of satellite InSAR and ground-based radar data	P. Farina	Università degli Studi di Firenze	Italy
63	A rockfall hazard appraisal and management system for quarries and open pit mines	S. J. Collins	Aggregate Industries Ltd	United Kingdom

No.	Title:	First Author:	Company:	Country:
64	3D finite element back analysis of a large rock slope failure on the East wall of the LAB Chrysotile Mine in Canada	M. Grenon	Université Laval	Canada
65	InSAR in the Clouds - Satellite-based Monitoring of Grasberg – Challenges, Solutions, and Value	M. Sullivan	PT Freeport	Indonesia
66	Improving cave productivity from Space Satellite-based Monitoring of Grasberg – Applications of Speckle tracking	D. Holden	SRK Consulting	Canada
67	A Directional Rock Mass Strength Model for Coal Mine Slopes Accounting for Structural Anisotropy and Slope Orientation	M. Tsang	The University of Queensland	Australia
68	DInSAR study over mining environments: Double geometry analysis and frequent update approach with Bulletins. Case study Silopi and Siirt Mines, Turkey	F. Sánchez	Tre Altamira	Spain
69	Implementation of on-line monitoring and numerical modeling at western slope of Belchatow mine (Poland)	Z. Bednarczyk	Poltegor-Institute	Poland
70	Remediation of In-Pit Dump Slope Failure at Bara Anugrah Sejahtera (BAS) Open Pit Coal Mine, Indonesia	L. Rachmad	Geomine	Indonesia
71	Identifying “signature” parameters of markedly brittle slope failures in monitoring data: experience from an open pit mine.	P. Farina	Università degli Studi di Firenze	Italy
72	Design, Development and Slope Performance of the East Highwall at the Barrick Cortez Hills Open Pit Mine, Northeast Nevada, USA	P. Jenks	Barrick	USA

No.	Title:	First Author:	Company:	Country:
73	Assessment of Depressurisation Approaches at Debswana's Orapa Mine, Botswana	B. Maswabi	Debswana Diamond Company	Botswana
74	Groundwater Characterization, Conceptualization, and the Role of Numerical Groundwater Flow Modelling: A Case Study at the Resolution Copper Mine	S. B. Meyerhoff	Itasca	USA
75	Effective Dewatering and Depressurisation at Kolomela Mine, South Africa	E. Hattingh	Kolomela Mine	South Africa
76	Non-Linear Strength Characterization and Slope Performance of Consolidated Valley-Fill Alluvium in Nevada	P. M. Strenk	Golder Associates	USA
77	Kinematic Evaluation of Pit Shell Designs using Geotechnical Block Models	J. Venter	AngloGold Ashanti	Australia
78	Managing the interaction between an active Sub-Level Cave and Open Pit operation from breakthrough to ongoing surface subsidence over 10 years at the Telfer Gold Mine	S. Nicoll	Newcrest Mining Limited	Australia
79	The use of new technologies to monitor mine slopes stability in Brazil	B. Castilho	Samarco Mineração	Brazil
80	Following a risk-based approach in slope design: The Thabazimbi failure case study	T. Dlokweni	Itasca	South Africa
81	Maximising geotechnical value through effective and efficient data management systems and training in open pit and underground mining operations	N. Bar	Gecko Geotechnics	Australia

No.	Title:	First Author:	Company:	Country:
82	Effect of Coal Rib stability on Internal dragline dump stability	A. Ray	Banaras Hindu University	India
83	Effect of weak layer on dump slope stability	R. Rai	Banaras Hindu University	India
84	Managing the interaction between open pit operations and historic and active underground workings at Telfer Gold Mine	S. Nicoll	Newcrest Mining Limited	Australia
85	Determination of rock discontinuity shear strength from laboratory direct shear test work	J. Cadman	Absolute Geotechnics Pty	Australia
86	Case study: optimisation of footwall slope design through critical review of structural orientation data from diamond drilling	R. Thomas	Absolute Geotechnics Pty	Australia
87	Interaction between underground and open pit in El Soldado Mine	E. Bermedo	El Soldado Mine	Chile
88	Important Considerations in Pit Wall Depressurisation for Optimising Slope Design: A Case Study	I. de Brugn	SRK Consulting	Australia
89	Back Analysis of Dump Slope Failure - a case study	S. Gupte	Visvesvaraya National Inst. of Technology	India
90	Augmenting geotechnical datasets to create better rock mass models	D. Walker	SRK Consulting	Australia
